Richard Snedaker, PLS

### Internet Base Station Service (IBSS)

California Surveying & Drafting Supply Inc. (CSDS) team of Dan McMahon, Eric Didion and Frank Frazer will be presenting on Trimble’s Internet Base Station Service (IBSS) using the new Trimble R980 GNSS Receiver. The Trimble IBSS service provides an easy way for you to stream RTK corrections over the internet from a base receiver you have set up to rover receivers. Once you have set up the GNSS receiver as a base station and chosen IBSS as your base data link, RTK corrections are automatically sent to any rover that is also using same Trimble Connect project. Any current user of Trimble Access 2023.10 or newer and Trimble Connect can utilize Trimble IBSS.

### LOCATION:

**Taix French Restaurant**  
**1911 Sunset Blvd,**  
**Los Angeles, CA 90026**
